Test Cases: **MakeReservation**

Trigger

In all test cases, the system user triggers the **MakeReservation** use case by selecting either "Reserve Your Stay" from the home page or selecting "Book Now" at the top menu bar of any page.

User then inputs the "Test Inputs" information and attempts to reserve a room by clicking "Reserve This Room" on the specific room.

**All "check-in dates" are assumed to be the current day or day in future unless specified otherwise.*

Test Case ID	mr_01
Assigned Tester	Matthew
Scenario	User makes a reservation of specific room given guest's dates and room preferences **(Main Success)**
Test Inputs	• System user is logged in • Check-In: 2026-04-23* • Check-Out: 2026-04-30* • Room Number: (Blank) • Bed, Theme, Quality, Smoking: Any
Expected Result	• System displays all available rooms to the user • User is able to select any given room and click "Reserve" • That reservation is added to the User's account
Actual Result	• System displayed all available rooms for the provided dates and filters • User able to select "Reserve" on any given room • System displayed "Reservation successful for Room 201. Total $194 for 1 night." • Reservation was added to user's bookings list
Status	Pass

Test Case ID	mr_02
Assigned Tester	Christine
Scenario	User is not logged in to the system
Test Inputs	• System user is not logged in • Check-In: 2026-04-23* • Check-Out: 2026-04-24* • Room Number: (Blank) • Bed, Theme, Quality, Smoking: Any
Expected Result	• System displays an error telling the user they must create a guest account before completing a reservation. • When user clicks away the error, they will be redirecting to the "Create Account" page, where they also have the ability to login.
Actual Result	• System displayed error "Please create a Guest account to complete this reservation. OK" • When user clicks X or "OK", user redirected to the "Create Account" page
Status	Pass

Test Case ID	mr_03
Assigned Tester	Karter
Scenario	Hotel system has no available rooms
Test Inputs	• System user is logged in as guest • Check-In: 2026-04-26* • Check-Out: 2026-04-29* • Room Number: (Blank) • Bed: SINGLE • Theme, Quality, Smoking: Any
Expected Result	• System does not display any room options for the user to select and displays an error saying there are no available rooms
Actual Result	• System does not display any rooms • System displays "No rooms match the active filters." • User is able to modify search criteria and search again
Status	Pass

Test Case ID	mr_04
Assigned Tester	Nolan
Scenario	Invalid Dates: Check-Out before Check-In
Test Inputs	• System user is logged in as guest • Check-In: 2026-04-26* • Check-Out: 2026-04-25* • Room Number: (Blank) • Bed: SINGLE Theme, Quality, Smoking: Any
Expected Result	• System returns there was an error with the dates and does not search for any rooms
Actual Result	• System highlights the Check-Out date in RED, effectively telling the user it is invalid and needs to be fixed • No rooms are searched for
Status	Pass

Test Case ID	mr_05
Assigned Tester	Georgia
Scenario	Invalid Dates: Check-In is in Past
Test Inputs	• System user is logged in as guest • Check-In: 2026-04-20 • Check-Out: 2026-04-25* • Room Number: (Blank) • Bed: SINGLE Theme, Quality, Smoking: Any
Expected Result	System returns there was an error with the dates and does not search for any rooms
Actual Result	• System highlights the Check-In date in RED, effectively telling the user it is invalid and needs to be fixed • No rooms are searched for
Status	Pass

Test Case ID	mr_06
Assigned Tester	Peter
Scenario	Invalid Dates: Check-In is same as Check-Out (ie. zero days)
Test Inputs	• System user is logged in as guest • Check-In: 2026-04-25* • Check-Out: 2026-04-25* • Room Number: (Blank) • Bed: SINGLE Theme, Quality, Smoking: Any
Expected Result	• System returns there was an error with the dates and does not search for any rooms
Actual Result	• System highlights the Check-Out date in RED, effectively telling the user it is invalid and needs to be fixed ○ If user sets the Check-In to be the same as Check-Out is, the system will update the Check-Out to be one day after the Check-In, automatically fixing the error. (Simulating a person moving their ideal dates) • No rooms are searched for
Status	Pass
